Each quality is the complement of the other, the supplement of the other, and in the United States, so recently rendered, point of baseness there is not the weight of the finger to choose between them. Look at the report signed by those men; in the spirit in which they wrote it, and if you can only make of the court to grant a temporary inyourselves, make the community, ap-proach the problems of today in the spirit that those men, your fellows, showed in approaching the great problem of yesterday, any problem or problons will be solve !.

In the long run and as a whole we are going to go up or go down together. Of course, there will be individual exceptions, small, local exceptions, exceptions in kind, exceptions in place, but as a whole if the commonwealth prospers, some measure of the prosperity comes to all of us. If it is not prosperity, then the adversity, though it may be unequally upon us, will weigh more or less upon all. It lies upon ourselves to deter-mine our own fate."

Chicago and Alton, Chicago, Milwauree and St. Paul; Atchison, Topeka and Santa Fe; Burlington and Quincy; Missouri Pacific; Chicago, Rock Jaland and Pacific; Wabash and Chicago Great Western.

The decision delivered by Judge Philand rebates made and allowed by the railroad companies were violative of the interstate commerce act, and that they tended to create a monopoly in the shipment of grain and products in favor of the individual shipper to the practical exclusion of all other dealers and like shippers; and that a question presented was whether or not a bill in criminations. The inclination of the mind of the court was that the acts ent, representing all the people concerned in the shipment of such products to appeal to its own courts to enjoin such violations of the law; that the bill known as the Elkins bill, under the decision of the supreme court of expressly confers such jurisdiction upon the federal courts in equity, both as to pending and future cases; that there can be no question of the right junction in the cases pending, which will be done on motions now entered, with leave to the defendants to take issue by answer as to the truth of the

RUSSIA BENT ON HOLDING I

Determined to Acquire Permanent Sovereignty in Manchuria.

IN DEFIANCE OF TREATIES.

Washington, April 27.-Minister Conger, from Pelcin, has cabled to Secretary Hny a synopsis of the demands made upon China by Russia respecting control of Manchuria.

The political impression here is that the Russian action is a distinct breach of faith with the Uniced States. The Russian government pledged itself three times formally and the documents are on record that the open door and Russian troops would be withdrawn as soon as peace was restored. Finally the latter promise took the shape of a treaty stipulation. It was provided that the evacuation should take place within three distinct periods. The last Russian soldier should have quit Manchuria on the 5th of this mentis, according to that treaty.

Officials declare that there is no dan er of war with Russia over this incilent. The government of the United States has recorded its ideas of what should be done in Manelturia, and as the result of Secretary Hay's projected conference with the president, it is probable that a further remonstrance vill be added. But it is anticipated that Russia will for the time being at east allay foreign oppositson, or at east that of the United States, by carrying out its pledge as to the "open loor." There will be no additional treaty ports in Manchuria if Russia neceeds in this last move.

An official of the government, well informed regarding Chinese affairs, says that the step taken by Russia is one for which she has been preparing for a number of years. Extraordinary as it may seem, he says that there seems to be no way of preventing the consummation of Russia's plan. He had no doubt that Russia would eventually apply the Russian tariff to the new territory, in which case the Uniin place of the finished products which now go to that part of China.
